INSTITUTIONAL BIOSAFETY COMMITTEE REVIEW

10. Review of proposed facilities and practices:

The Chair provided an overview of the arrangement for the facilities and practices.

Points of Discussion:

1. An Institutional Representative confirmed that the plumbed eyewash station in the Nurse's Station Room is within a 10 second walk of all dosing rooms.
2. The Committee recommended that the Institution purchase prefilled disposable eyewash bottles designed for specifically flushing eyes in the event of an eye exposure. These bottles typically come in volumes of 16 or 32 ounces. An Institutional Representative agreed to this arrangement.
3. An Institutional Representative confirmed that after an instillation, the contents of the bladder may be removed via a catheter into a container or the subject may void the contents of their bladder directly into a urinal container.
4. An Institutional Representative confirmed that the two types of containers have lids which seal and that these are the discarded into the biohazardous waste stream.
5. The Committee recommended that Biosafety SOP Section 3.5.2 be revised to indicate that bleach will be added to the urinal container after voiding to prevent splashes of the bleach onto skin.
6. The Committee recommended that Biosafety SOP Section 3.5.2 be revised to indicate that the containers will be sealed with a lid and then disposed of into the biohazardous waste stream.
